

**Principal's Report**  
**123<sup>rd</sup> Annual Prize Giving – November 14, 2005**

Our Honourable Chief Guest, Dr. RK Pachauri, President, Vice President and Members of the Board of Governors, Mr. Kuldeep Bhatnagar, guests, parents, Old Dalians, especially the reunion batch of 1980, colleagues and students – I extend a warm welcome to you all for the 123<sup>rd</sup> Annual Prize Giving of the Daly College.

Dr. RK Pachauri is one of the world's leading environmentalists and economists and it is indeed kind of you Sir to take time out for us. Dr. Pachauri wears many hats. One is as Director General of TERI, the Tata Energy Research Institute, and another as Chairman of the Intergovernmental Panel on Climate Change which has been established by the World Meteorological Organisation and the United Nations Environment Programme.

Acknowledging Dr. Pachauri's immense contribution in the field of environment, he was awarded the Padma Bhushan in 2001 by the Govt. of India.

Dr. Pachauri obtained his Masters in Science in Industrial Engineering, a PhD in Industrial Engineering, a PhD in Economics and served as Assistant Professor and later visiting Faculty member in the Department of Economics and Business, all at the North Carolina State University in the USA. He later returned to India and was Director of the Consulting & Applied Research Division of the Administrative Staff College of India in Hyderabad.

In 1981 he shifted to TERI where he is Director General. TERI is involved in doing original work in areas of energy, environment, forestry, biotechnology and conservation of natural resources.

Dr. Pachauri has, after joining TERI, been involved in a major way on the world stage. As a Visiting Professor in Resource Economics at West Virginia University, as Senior Visiting Fellow at East West Centre USA, as Visiting Research Fellow to the World Bank in Washington and as Advisor to UNDP. He has also taught at Yale University, USA as a Mc Cluskey Fellow.

He is serving on a number of Boards and Committee which include the Board of International Solar Energy Society, Member of the World Resources Institute Council, Chairman of Work Group (A) of the World Energy Council, the Committee on Developing Countries, the Chairman of the International Association for Energy Economics in Washington and President of the Asian Energy Institute. He has served on the Board of the Institute for Global Environmental Strategies of the Government of Japan.

Within India his responsibilities are too numerous to list here. He has served on the Board of GAIL, National Thermal Power Corporation and Indian Oil Corporation. In 2001 he was appointed Member, Economic Advisory Council to the Prime Minister of India.

Apart from his numerous papers and articles, he has also authored 21 books. And most important of all he has still found time to be with us at the Daly College.

I feel as though I have read out the bio datas of at least four eminent personalities. That one man can do many things and do them all so well should be a lesson to those of us who make excuses for doing one thing badly because we were busy doing something else.

Our last Board of Governors completed its 5-years term in the summer. In these 5 years the College has seen stability and growth in almost all spheres. I take this opportunity to thank the outgoing members, namely Maharaj Raghuraj Singhji Piploda, Dr. Surendra Singh Garha, Mr. Ganesh Singh Jhabua, Mr. Madhav Dhabhai and Mr. Danveer Singh Chhabra for their invaluable contribution to the College.

The new Board which will guide the College consists of Maharaja Tukoji Rao Puar of Dewas Sr. as President, Maharaj Narendra Singhji Jhabua as Vice President, Mr. Dilip Kasliwal, Mr. Kamlesh Kasliwal, Mr. Tejvir Juneja, Mr. Arun Muchhal, Capt. Prithviraj Rishi, Mr. Hemant Patwa, Mr. Brijendra Pratap Singh and the Principal.

The Principal's report at the Annual Prize Giving is essentially a report on the previous year's achievements, I am very glad that this year because of the achievements of our students, the report is really long. I am reminded of a joke where the teacher asks a child what he would call a person who talks too much. The child says he would call such a person a teacher. Well now let's find out for how long a Head Teacher can talk.

But first a few important announcements:

1. For those students who are now in Class VIII or below, the marking system for the Class X Board exams is likely to be revised from marks to grades.  
Also instead of 5 subjects they will do 6 subjects but only the best 4 will be counted.  
The earlier proposal to make the Class X exam optional has been rejected. The exam can however be taken in a phased manner.  
No one is very clear as to what this implies.
2. From 2005 onwards IIT candidates must have a minimum of 60% in the Class XII Boards. This is a welcome move for schoolteachers.
3. Faculty members of the Institute of Career Studies, Lucknow, interact with our senior students and their parents once a year. The Board has now sanctioned two additional sessions in a year. Parents should keep in mind that they and their wards are also welcome to consult ICS through email throughout the year for any clarifications or advice.
4. DC celebrates its 125<sup>th</sup> year in December 2007. I do hope Old Dalians will make a special effort to attend the celebrations.

I would like to thank all those involved in working on this project, especially Mr. Panni Padgaonkar, Mr. Rajendra Singhji and Col. Giriraj Singh.

I urge all Old Dalians to visit the museum and to donate generously in terms of old photographs, memorabilia etc. so that the museum can grow and your own memories be safeguarded for your children and grandchildren.
